cessive dogma of reified institutions of belief and the excessive spontaneity of beliefs largely produced by accusation, rivalry, and protest. Perhaps the answer to the self's dilemma must be twofold, and religion and magic are the twin strategies of the social system that needs its individuals as much as they need it.

None of this is to say that *Stolen Lightning* wavers in its understanding. Debate is the welcome response to a good and controversial book, and O'Keefe's project is admittedly to give a descriptive, not a formal, theory of magic. The jacket copy hails it as a revolutionary study akin to the works of Frazer, Freud, and Max Weber, and while time is the best judge of boasts, Daniel O'Keefe has certainly written a rich and impressive book with the potential to be a classic. Anyone with the slightest interest in magic will want to own it. The final test of Mr. O'Keefe's intelligent and enjoyable book, however, will be whether it can check the superstitious avoidance of magic and open a space for additional scholarly debate on this ancient and enduring problem of mankind.

life. It is a common practice throughout the church. I had never dreamed it would be offensive to anyone.

But come to think of it, if viewed in a certain light, it is a strange custom. Can one imagine St. Paul saying to the church of Ephesus or Corinth, "Timothy needs money, so urge donations for your prayers, hold a raffle, and start BINGO!"?

It is the viewpoint of dedicated Christians such as Mr. Muccilli that forces us to rethink our practices and grow toward a fuller stature in Christ. We will still be praying here at the monastery. We will still accept donations. But we will certainly be more conscious of the way this custom could be interpreted and we will, I am sure, be even more careful that our life of prayer never degenerates to an exercise in fundraising!

Thank you, Mr. Muccilli, for helping our awareness of our own spiritual life to deepen. God bless you.
